AI Integration — Complete Document Set

Date: 17.07.2026

Prepared For: GVW

Prepared By: Lysa Solutions

A. Discovery & Evaluation Documents

Use-Cases

- Problem statements
- Expected outcomes
- Department owner
- Data sources
- Pain points & current process gaps

Use Case Evaluation Sheet

- Data availability
- Management priority
- Third-party dependency
- Feasibility & ROI
- Operational readiness

Use Case Shortlisting Report

- Scoring summary
- Final shortlisted use cases
- Rationale for selection

B. User & Experience Documents

User Personas

- User types
- Roles & responsibilities
- Motivations
- Pain points
- Expected benefits

User-Journeys

- Step-by-step user journey
- Touchpoints
- Emotions/frustrations
- Opportunities for AI intervention

User-Flows

- Detailed workflow diagrams
- Inputs/outputs
- Decision points
- Exceptions

C. Requirements & Prioritization Documents

BRD – Business Requirements Document

- Business problem
- Scope & out-of-scope
- Success metrics
- Risks & assumptions
- Stakeholder list

FRD – Functional Requirements Document

- Functional flows
- System behavior
- Input/output definitions
- Integration points
- Acceptance criteria

Feature-Prioritization

- Must-have
- Should-have
- Could-have

- Won't-have
- Priority rationale

NFR

- Performance
- Scalability
- Security
- Availability
- Compliance requirements

PRD

- Product vision
- Feature list
- Release plan
- User stories
- Acceptance criteria

D. Estimation & Planning Documents

Effort-Estimation

- Module-wise effort
- Total hours
- Resource allocation
- Timeline estimation

Function-Point-Estimation

- Function point breakdown
- Complexity scoring
- Estimated development effort

Project Plan / Timeline

- Milestones
- Sprints

- Dependencies
- Risks

RACI Matrix

- Who is Responsible
- Who is Accountable
- Who is Consulted
- Who is Informed

E. Architecture & Technical Documents

High-Level Architecture (HLA)

- System overview
- Major components
- Integration points
- Data flow

Low-Level Architecture (LLA)

- Detailed component design
- API contracts
- Database schema
- Deployment model

AI Architecture Blueprint

- RAG architecture
- Prompt flow design
- Model selection rationale
- Guardrails

API Specification (Swagger/OpenAPI)

- Endpoints
- Request/response schemas
- Authentication

- Error codes

F. Security, Guardrails & Compliance Documents

AI Security Policy

- Data handling rules
- PII protection
- Access control

Guardrails Document

- Prompt filtering
- Output validation
- Hallucination control
- Safety rules

Azure Key Vault Secrets Map

- Secrets list
- Rotation policy
- Access matrix

Compliance Checklist

- ISO/SOC alignment
- Internal IT policies
- Audit requirements

G. Monitoring, Evaluation & Observability Documents

Metrics

- Product usage metrics
- AI performance metrics
- Adoption metrics
- Business impact metrics

Monitoring & Observability Plan

- Azure Monitor dashboards
- Prometheus metrics
- Grafana layouts

LLM Evaluation Report

- Accuracy
- Relevance
- Hallucination rate
- Regression results

Incident & Error Management SOP

- Escalation flow
- Severity levels
- Resolution steps

H. Deployment & Release Documents

Deployment Guide

- Environment setup
- Release steps
- Rollback plan

Release Notes

- Version changes
- Fixes
- Enhancements

Change Log

- All updates
- Dates
- Owners

I. Adoption, Training & Change Management Documents

Training Manual

- Admin guide
- User guide
- FAQs

Onboarding Guide

- How to start using the product
- Access instructions
- Support channels

Adoption Dashboard

- DAU/MAU
- Feature usage
- Feedback scores

J. Governance & Long-Term AI Strategy Documents

AI Governance Framework

- Roles
- Responsibilities
- Review cycles

Steering Committee Charter

- Meeting cadence
- Decision rights
- Escalation path

AI Roadmap

- Quarterly goals
- Future use cases
- Expansion plan

Model Retraining & Drift Management Plan

- Monitoring
- Retraining triggers
- Versioning

K. Testing & Quality Engineering Documents

These **six documents** are the minimum required for end-to-end validation of any AI product.

1. Test Strategy

A single document that defines:

- Scope of testing
- Types of testing included
- Tools & environments
- Risk-based testing approach
- Entry & exit criteria

Why it's essential: It aligns all teams on *what* will be tested and *how* quality will be measured.

2. Functional & API Test Cases

One consolidated document containing:

- Module-wise functional test cases
- API endpoint test cases
- Input/output validation
- Error handling
- Acceptance criteria mapping

Why it's essential: Ensures the product works as expected and meets FRD/PRD requirements.

3. Regression Test Suite

A single document listing:

- Critical workflows

- High-risk areas
- AI prompt regression cases
- RAG retrieval regression cases

Why it's essential: Guarantees stability across releases and prevents breaking existing features.

4. Performance Test Report

One report covering:

- Load test results
- Stress test results
- Latency, throughput, error rate
- Bottleneck analysis
- Recommendations

Why it's essential: Validates NFRs (performance, scalability, availability).

5. Security Test Report

One consolidated report including:

- Vulnerability scan results
- Penetration testing summary
- RBAC validation
- Secrets & API security checks
- OWASP Top 10 coverage

Why it's essential: Ensures the product is secure, compliant, and enterprise-ready.

6. LLM/RAG Evaluation Report (Mandatory for AI Projects)

A single AI-specific evaluation document covering:

- Accuracy
- Relevance
- Hallucination rate
- Safety & toxicity score
- Retrieval quality (RAG)

- Guardrail validation
- Prompt regression results

Why it's essential: Validates AI correctness, safety, reliability, and trustworthiness.

Executive Summary — Mandatory Core Documents

These are the minimum essential documents every AI project must have:

1. Use Cases
2. Personas
3. User Journeys
4. User Flows
5. Feature Prioritization (FPE)
6. NFRs
7. BRD + FRD + PRD
8. Effort Estimation + Function Point Estimation
9. Metrics Document
10. Architecture (HLA + LLA)
11. Security & Guardrails Document
12. Monitoring & Evaluation Plan
13. Deployment Guide
14. Governance Framework
15. Testing and Quality Engineering Documents
